

DAO PlayMarket 2.0

DAO PlayMarket 2.0 is a decentralized Android app store, combined with an ICO developer platform, crypto exchange, that accepts payment in crypto currency.

The main goals and objectives of **DAO PlayMarket 2.0** are to create a sustainable economic model for developers, investors and users, and introduce a unified standard for tokenizing the mobile applications market.

Advantages of **DAO PlayMarket 2.0** over other platforms:

- allows android applications to issue their own tokens and implement them on the built-in ICO platform;
- The platform is resistant to censorship - main information is stored in blockchain, which allows you to provide access to applications from anywhere in the world;
- The **DAO PlayMarket 2.0** platform integrates a decentralized crypto exchange, which will include an open API;
- Paid applications and in-app purchases will be payable via cryptocurrency.

Ticker for the **DAO PlayMarket 2.0** Token - **PMT**

Token Standard - **ERC20**.

Total Supply - **3 000 000**

Token Allocation (%): Investors/Crypton.Studio – **75%/25%**
